

BeyondTech

Software & IT Consulting — Saudi Arabia

COMPANY PROFILE

Software · Integration · Automation · Digital Products

ABOUT

Software built for how you work.

BeyondTech is a Jeddah-based software and IT consulting company. We help businesses turn manual processes, disconnected systems, and operational challenges into practical software solutions.

We build custom applications, integrate existing systems, automate workflows, and develop digital products around the way each business actually operates.

HEADQUARTERS

Jeddah, Saudi Arabia

COVERAGE

WHAT WE DO

From idea to working software.

We work across the full lifecycle — from understanding the problem and designing the solution to development, integration, and ongoing improvement.

01

Development

Custom Software

Web and mobile applications, internal platforms, portals, dashboards, and digital products built around specific business needs.

02

Integration

APIs & Systems Integration

Connect software, services, and data so different parts of a business can work together.

03

Automation

Business Automation

Turn repetitive manual work into reliable digital workflows that save time and reduce operational friction.

04

Consulting

IT & Technology Consulting

Practical technical guidance for businesses planning, improving, or modernizing their systems.

One team, start to finish — strategy, design, development, integration, and ongoing support, all under one roof.

SELECTED WORK

Selected products and platforms.

NEUROALIGN

Live

Coaching Platform

A platform for coaches and clients, with separate trainer and client experiences, secure invitations, and role-based access.

NUTRITION TRACKER

Live

Health & Nutrition

A multi-user nutrition platform for coaches and clients, with wearable-data integration and English, Arabic, and Swedish experiences.

ZABETHA

In development

Nutrition & Wellness

A nutrition platform connecting people, nutrition coaches, and meal providers.

RATTIL

Live

Education

An Arabic-first Quran recitation homework platform designed for teachers and young students.

COMPLIANCE TOOL

Live

Compliance Audit Platform

Upload a manual or policy document and get a pillar-by-pillar gap report with a 0–100 score and a specific fix for every gap. Works for any regulated field, including aviation (GACAR Part 151).

From internal tools to customer-facing products, we build around real workflows and practical use cases.

WHY BEYONDTECH

Technology that fits the business.

01

Business first

We start with the process, not the technology, and design solutions around how the business actually operates.

02

Works with what you already have

Existing software, APIs, data, and workflows are the starting point, not something to replace by default.

03

Built for Arabic and Saudi business

Arabic and English, right-to-left ready. Interfaces and bilingual products designed for how businesses in Saudi Arabia work.

04

Compliance-aware

We build with regulation in mind. Our compliance audit tool checks manuals against GACAR Part 151 and works for any regulated field.

Let's talk.

Projects, partnerships, or something you want to build.
